The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 7, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Contrini in view of Thomas and Morris.

Contrini discloses a set of devices comprising a creeper comprising: a base member and roller elements.

The second element in the set comprising a base member and roller elements.

Contrini however, does not disclose his device as comprising: a handle member extending vertically horizontally and cushion members as specifically claimed.

Thomas discloses a similar device comprising handles.

Morris discloses a device comprising an assembly Figs 1 and 2 which extends substantially vertically from the base member (11) of his device.

Given the above teachings the examiner notes that it would have been obvious to add both types of structures to the device of Morris. One for providing a headrest and one for carrying the device and holding onto when occupying and moving the device while positioned on the device.

As to the devices including padding the examiner note that to include padding on creeper members is notoriously well known in the art.

The examiner further note that the claims are so broad, so as to read on two creeper members sitting side by side in a box, work room or automotive shop.
